POINONOUS MEDICENES. The theory that the virus, of disease can

safely counteracted by doses of poison, is take and dangerous. Within the last twenty-five years, not less than a score of virulent poisons have been added to the repository of the medelal profourion. They are given in small doses, otherwise they would destroy life immediately ; but ever in minute quantities, they produce, ultimately, very disastrous effects. It is unwise and unphilosiphical to employ, as remedies, powerful and usidious drugs, which, id subjugating one disesse, sow the seeds of another still more unmanageable. None of these terrible medicaments op-erates with as much directness and certainty upon the causes of disease as Hostettor's Stomach Bitters, a tonic and corrective, without a single deleterious ingredient in its composition.

Avegue and quinis are given for intermittents;
brom-te of pottassium for nervous disorders;
strychniss and prussic acid for general debility; mercury, in various forms, for liver complaint; preparations of bleroftem and opium for sleep-lessness; and yet these deadly drugs do not compare, as specifica to the diseases above one merated, with that wholesas "egetable invigorant merated, with that wholesale egetable invigorant and alterative, while they are as so permissens that it is automishing any physician sould take the responsibility of prescribing them. tat invalids, for their own sakes, try the Bittera become they resort to poisons.
